Where We Went

SITE PHOTO — DAO KATHMANDU

District Administration Office (DAO)

Kathmandu, Babarmahal

Under the Ministry of Home Affairs

Headed by the Chief District Officer (CDO)

About DAO Kathmandu

District-level government office under the Ministry of Home Affairs

District-Level Administration -Subordinate Regional Offices

Public Service Coordination

Passport , NID & Citizenship

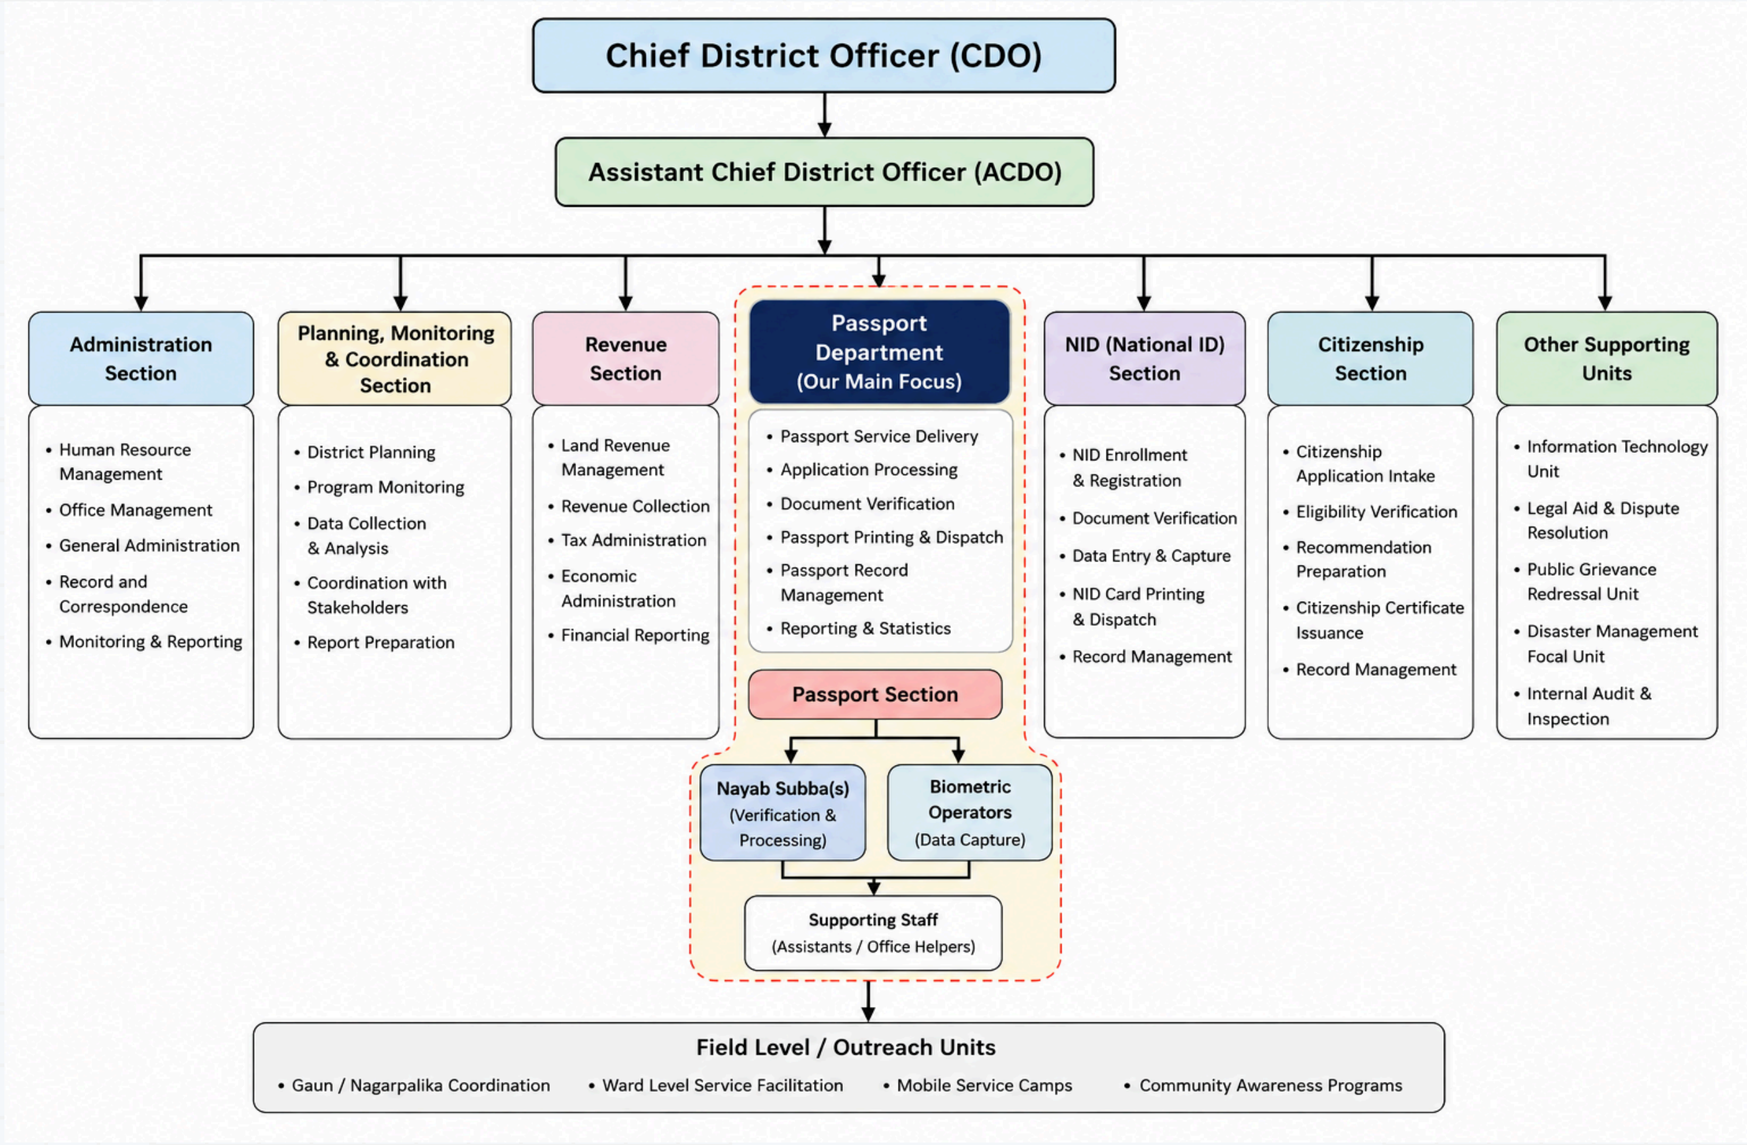

Legal & Administrative Sections

Financial & Civil Registration Sections

“Studied the real passport delivery process on-site.”

Organizational Structure

Visited Department : Passport Department

Role & Objectives

- **Handles verification and live enrollment for ordinary e-Passports for Kathmandu residents.**
- **Acts as the district verification node between local citizens and the central Department of Passports (Tripureshwor).**
- **Cross-checks citizenship records and National ID (NID) data before issuing passport credentials and sends to Singha Durbar Office for verification once again.**

Field Study on Passport Processing, Biometric and Citizen Service Delivery at DAO Kathmandu

Key Systems & Integrations

National ID Mandatory Linkage : Real-time integration with NID biometric database for identity verification.

Digital Pre-Enrollment Portal : Time-slot appointment management system to regulate applicant queues.

Biometric Station : Live facial photography, 10-fingerprint scanning, and digital signature capture.

Their Objective

Citizen-Centric

Accountable & efficient public service delivery

Digital Nepal Agenda

Digitally-enabled governance nationwide

Secure & Traceable

Trustworthy e-passport handling end-to-end

What We Observed

Passport Service Workflow

Application

Collection

Biometric-Based Processing

Photo
+ Fingerprints +
Applicant Data

Identity verification is linked to biometric enrollment

NID & Inter-Office Coordination

NID Section ↔
Passport Officials
↔ DAO Staff

Information and verification require coordination across sections

Why This Study?

Application & production are digitized — delivery & collection are NOT

VISIT 1

Apply Online &
Complete Biometrics

VISIT 2

Return In-Person
Just to Collect Passport

Long Queues

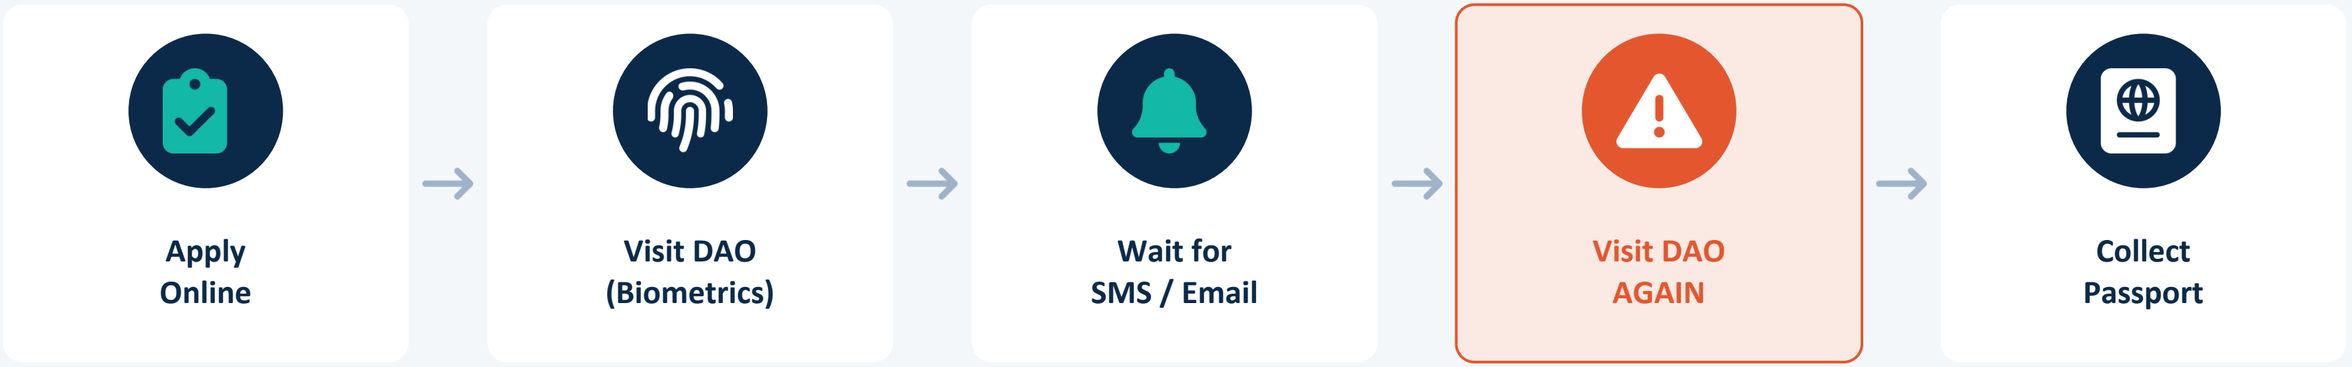

Wasted Time

Manual Coordination

AS-IS WORKFLOW

Current Process

Pain Point — an unnecessary second physical visit

OUR PROPOSAL

Connecting DAO Kathmandu + Department of Passports + Nepal Post via APIs

SMS status updates sent to the citizen at every step

Key Features

- QR / Barcode Tracking
- Real-Time SMS Updates
- Citizen Tracking Portal
- Admin Dashboard
- Failed-Delivery Handling
- Audit Logs & Security (RBAC)

System Modules

- Dispatch Registration
- SMS Notification
- Hulak API
- Admin Dashboard
- Exception Management
- Reports / Analytics
- QR/ Barcode
- Shipment Tracking
- Citizen Portal

What It Does NOT Change

NEW: Integration, Tracking & Delivery Layer

↓

UNCHANGED: Core DoP Systems, Issuance & Biometric Data

- Passport Issuance
- Biometric / Citizenship Data
- Core DoP Systems

Only an integration & delivery layer added on top of existing systems.

Impact

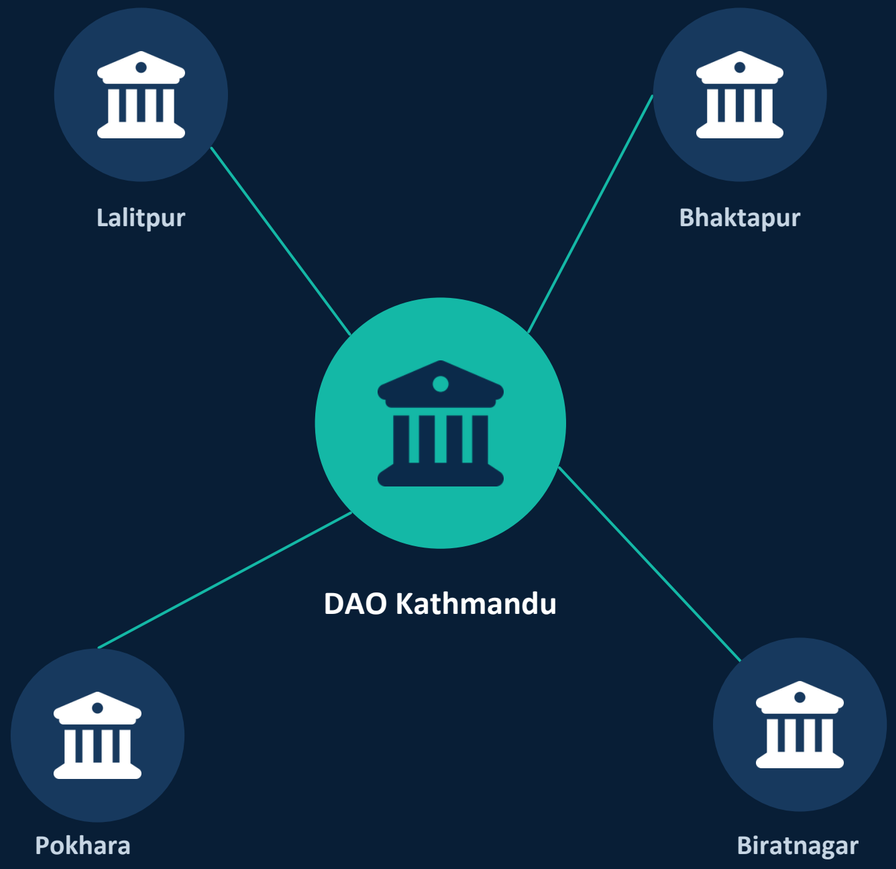

For Citizens

- No second visit required
- Real-time delivery updates
- Less waiting time

For Government

- Reduced administrative workload
- Stronger accountability
- Data-driven decisions

Future Vision

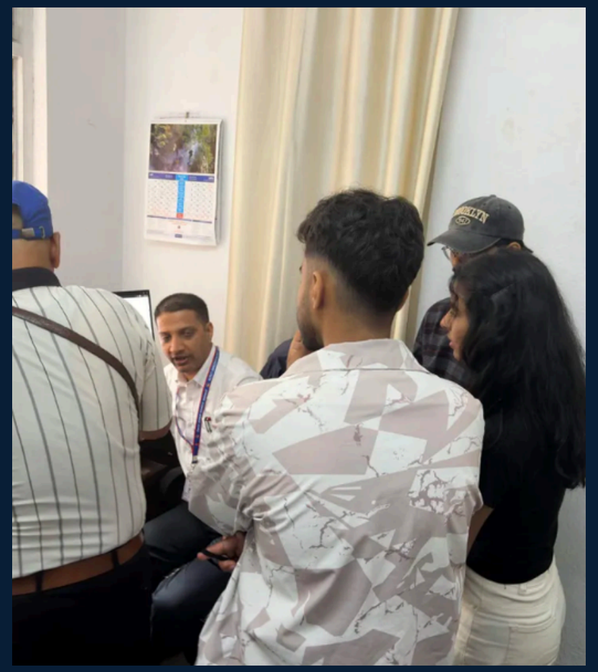

Central Integration Platform

Future: Other Documents (Citizenship, Licenses...)

Scaling beyond Kathmandu into one national e-Governance service network

Organization Visit

Thank You!
